

As a Business Analyst, I will gather the requirements for the Data Analytics course by conducting interviews, surveys, and research to ensure a comprehensive understanding of the company's goals and the expectations of learners. Based on the gathered information, I will create a template or requirement table that consists of various parameters to describe the requirements for the Data Analytics course. Here is an example of the template:

Requirement Parameter	Description
Course Title	The title of the Data Analytics course that accurately reflects the content and objectives.
Target Audience	The intended audience for the course, such as students, professionals, or individuals with a specific background.
Course Objectives	Clear and measurable objectives that define what learners should be able to achieve after completing the course.
Prerequisites	Any required knowledge or skills that learners should possess before taking the Data Analytics course.
Course Duration	The estimated length of the course in terms of hours or weeks.

Requirement Parameter	Description
Course Format	The delivery format of the course, such as online, blended, or instructor-led.
Course Structure	The overall structure of the course, including modules, lessons, and topics covered.
Learning Materials	The resources and materials provided to learners, such as video lectures, slide decks, reading materials, case studies, and quizzes.
Real-time Project	A description of the real-time project(s) that will be included in the course to provide learners with practical experience in applying Data Analytics techniques.
Course Syllabus	A detailed outline of the topics and subtopics covered in the course, including a breakdown of content by modules or weeks.
Assessment Methods	The methods used to assess learner understanding and progress, such as quizzes, assignments, projects, or exams.
Certification	Whether the course offers a certification upon successful completion, including any requirements or criteria for obtaining the certification.

Requirement Parameter	Description
Instructor Qualifications	The qualifications and experience expected from instructors who will deliver the course.
Interactive Features	Any interactive elements or features incorporated into the course, such as discussion forums, live Q&A sessions, or virtual labs.
Technical Requirements	The hardware, software, or technical specifications necessary for learners to access and participate in the course.
Support and Assistance	The availability of support channels, such as email, chat, or discussion forums, to assist learners with course-related questions or issues.
Feedback Mechanism	The process for collecting feedback from learners to improve the course content, delivery, and overall learning experience.
